

SCOTT WEINKLE ARCHITECT

July 5, 2010,

To Whom It May Concern,

Martin Tomczyk, the owner of MRTA Design Construction Inc, was the contractor for The New American Cinema Group / The Film-Maker's Cooperative office renovation I recently designed in midtown Manhattan. Martin showed great organizational and technical proficiency and a keen understanding of the limited budgetary issues. His subcontractors were professional and the project was constructed in a timely manner. He also possesses an architect's eye for material selections, details and composition which enabled me to design the project from another city, as he constantly sent me progress photographs for discussion and approval. I would recommend him highly based on the work he has done for me and based on completed projects for other clients that I have visited.
